PROFILE

Principal DevOps and Platform Engineer with **35+ years in IT** — over 20 specialising in cloud infrastructure, distributed systems, and platform engineering. Deep expertise across **AWS, GCP, and hybrid/on-premise** environments, with a proven record delivering production-grade infrastructure for fintech, gaming, IoT/SmartHome, telecoms, and media. Practitioner of **GitOps, IaC-first engineering**, and Unix-philosophy tooling. Recent experience encompasses ML model training environments, LoRA-based LLM fine-tuning, and graph-database-accelerated inference pipelines. Active open-source contributor; principal language: **Ruby**.

TECHNICAL SKILLS

Cloud Platforms

AWS (primary), GCP, Azure

Containers & Orch.

Kubernetes, K3s, Docker, Docker-Compose, Docker-Swarm, Vagrant, Portainer, K9s, Thudernetes

IaC

Terraform, Ansible, Puppet, Chef

CI/CD & GitOps

GitHub Actions, TeamCity, Flux, GitOps patterns

Languages	Ruby · Rails · Sinatra · Python · Perl · Shell · Kotlin · Java · C · Lua
Databases	MySQL, PostgreSQL, Oracle, DynamoDB, AuroraDB, ElasticSearch, Redis, Neo4J, SQLite
Messaging	Kafka, RabbitMQ, MQTT, Mosquitto
Observability	Grafana, DataDog, CloudWatch, Wavefront, Kibana, PagerDuty
CDN / Edge	Fastly Edge
ML / AI Infra	LLM fine-tuning (LoRA), graph-DB-accelerated inference, bespoke Linux distro builds
Practices	SRE, DevOps, Agile/Scrum/Kanban, GitOps, IaC-first engineering

PROFESSIONAL EXPERIENCE

Senior DevOps Engineer

May 2026 – Present

Transform UK · London

- ▶ Working with HMRC to provide a state of the art Online Trade & Tariff service
- ▶ Improvement of existing observability capabilities and design of novel tooling
- ▶ Contribute to CI/CD pipeline
- ▶ Complement and improve existing DevOps team and capabilities

Senior DevOps Engineer

Jun 2025 – Jan 2026

Scalpel Ltd · London

- ▶ Researched and evaluated AI/ML technologies to accelerate model training and inference performance
- ▶ Designed hybrid ML model training environments on AWS, including a bespoke Linux distribution
- ▶ Built and integrated Terraform IaC management + GitOps pipeline from the ground up
- ▶ Automated AWS + GCP infrastructure provisioning; provided multi-cloud domain expertise organisation-wide

Senior Platform Engineer

Aug 2024 – Mar 2025

Zilch Technology · London

- ▶ Maintained and optimised AWS infrastructure for critical financial services
- ▶ Last-line support ensuring financial platform uptime via Kubernetes-managed services
- ▶ Terraform development for AWS infrastructure; Linux development and administration
- ▶ Supported external promotion asset distribution pipeline

DevOps / LiveOps Engineer

Mar 2023 – Apr 2024

Supermassive Games · Guildford

- ▶ Led transition from traditional AAA game development to cloud-based LiveOps model
- ▶ Designed and implemented CDN mirroring on Fastly Edge, reducing latency and costs
- ▶ Built containerised game-server infrastructure using Kubernetes and Thudernetes
- ▶ Kubernetes configuration management via GitOps/Flux across AWS, GCP, and Azure
- ▶ Automated asset mirroring, package distribution, and build pipelines
- ▶ Built Unreal Engine macOS build tooling; EC2 Linux instance configuration via GitOps

SRE Technical Lead · DevOps

Jul 2015 – May 2022

Centrica Hive · London

- ▶ Provided technical direction and SME support for Hive IoT platforms in production and staging
- ▶ Developed Ruby-based deployment and orchestration systems for AWS
- ▶ Implemented Kafka messaging architecture and multi-cloud provisioning (AWS + GCP)
- ▶ Built cost-monitoring tools; enhanced platform security posture
- ▶ Created build pipelines using GitHub Actions, TeamCity, and AWS tooling
- ▶ Observability via Wavefront, CloudWatch, Kibana/Elasticsearch (including Lua development)
- ▶ Linux administration and kernel modifications to support Java development teams

Senior Consultant

May 2000 – Jun 2015

Cartesian · London

- ▶ Automated infrastructure provisioning with AWS and custom Ruby/Python tooling
- ▶ Designed modular OO Perl frameworks for billing assurance systems
- ▶ Oracle database administration, migration, and reverse engineering
- ▶ Managed Linux systems for optimised performance across multi-client environments

KEY CLIENT ENGAGEMENTS

The Cloud	Internal virtualised infrastructure using Chef and Ruby
SKY UK/Ireland	Automated call generation (BluGem/Perl); Oracle DBA
Virgin Media / ntl / Telewest	Telephony switch data extraction via Perl::Expect
Base Telecom (Brussels)	Oracle DB migration and CRM reverse engineering
Vodafone Ireland	In-situ replacement of mediation systems
IBM Hursley Park	SME for mediation system switch for O2

Web Developer → Senior Consultant

1995 – 2000

Various

- ▶ Integrated legacy systems with early web applications for dynamic online delivery
- ▶ Telephony switch provisioning, mediation, billing, and database administration

EDUCATION

University of California San Diego

1984–1990

BSc Microbiology & Biochemistry (Bioinformatics emphasis) ·
Minor: Music

INTERESTS & ACTIVITIES

🏉 Rugby · former Southwark Tigers RFC coach

💻 Open-source software

🏠 SmartHome integration

🍳 Enthusiastic cook

📺 Catch-22 · Snowcrash · Cryptonomicon
