PROFILE

Principal DevOps and Platform Engineer with 35+ years in IT — 20+ specialising in cloud infrastructure, distributed systems, and platform engineering. Deep expertise across AWS, GCP, and hybrid/on-premise environments, with a proven record delivering production-grade infrastructure for fintech, gaming, IoT/SmartHome, telecoms, and media. Practitioner of GitOps, IaC-first engineering, and Unix-philosophy tooling. Recent experience encompasses ML model training environments, LoRA-based LLM fine-tuning, and graph-database-accelerated inference pipelines. Principal language: Ruby.

TECHNICAL SKILLS

Cloud Platforms	AWS (primary), GCP, Azure	Containers & Orchestration	Kubernetes, K3s, Docker, Docker-Compose, Docker-Swarm, Vagrant, Portainer, K9s, Thudernetes
IaC	Terraform, Ansible, Puppet, Chef	CI/CD & GitOps	GitHub Actions, TeamCity, Flux, GitOps patterns
Languages	Ruby, Rails, Sinatra · Python · Perl, Perl::Expect · Shell · Kotlin · Java · C · Lua	Databases	MySQL, PostgreSQL, Oracle, DynamoDB, AuroraDB, ElasticSearch, Redis, Neo4J, SQLite
Messaging	Kafka, RabbitMQ, MQTT, Mosquitto	Observability	Grafana, DataDog, CloudWatch, Wavefront, Kibana, PagerDuty
CDN / Edge	Fastly Edge	ML / AI Infra	LLM fine-tuning (LoRA), Graph-DB-accelerated inference, bespoke Linux distros
Practices	SRE, DevOps, Agile/Scrum/Kanban, GitOps, IaC-first engineering		

PROFESSIONAL EXPERIENCE

Senior DevOps Engineer

Scalpel Ltd · London · Jun 2025 – Jan 2026

- Researched and evaluated AI/ML technologies to accelerate model training and inference
- Designed hybrid ML model training environments on AWS, including bespoke Linux distro
- Built and integrated Terraform IaC + GitOps pipeline from the ground up
- Automated AWS + GCP infrastructure provisioning; provided multi-cloud domain expertise organisation-wide
- Automated AWS infrastructure provisioning; provided cloud domain expertise organisation-wide

Senior Platform Engineer

Zilch Technology · London · Aug 2024 – Mar 2025

- Maintained and optimised AWS infrastructure for critical financial services
- Last-line support ensuring financial platform uptime via Kubernetes-managed services
- Terraform development for AWS infrastructure; Linux development and administration
- Automated AWS + GCP infrastructure provisioning; provided multi-cloud domain expertise organisation-wide
- Supported external promotion asset distribution pipeline

DevOps / LiveOps Engineer

Supermassive Games · Guildford · Mar 2023 – Apr 2024

- Led transition from traditional AAA game development to cloud-based LiveOps model
- Designed and implemented CDN mirroring on Fastly Edge, reducing costs and latency
- Built containerised game-server infrastructure using Kubernetes and Thudernetes
- Kubernetes config management via GitOps/Flux across AWS, GCP, and Azure
- Automated asset mirroring, package distribution, and build pipelines
- Built Unreal Engine macOS build tooling; EC2 Linux instance config via GitOps

SRE Technical Lead · DevOps

Centrica Hive · London · Jul 2015 – May 2022

- Provided technical direction and SME support for Hive IoT platforms in production and staging
- Developed Ruby-based deployment and orchestration systems for AWS
- Implemented Kafka messaging architecture and multi-cloud provisioning (AWS + GCP)
- Built cost-monitoring tools; enhanced platform security posture
- Created build pipelines (GitHub Actions, TeamCity, AWS tooling)
- Observability via Wavefront, CloudWatch, Kibana/Elasticsearch (incl. Lua development)
- Linux administration and kernel modifications to support Java development teams

Senior Consultant

Cartesian · London · May 2000 – Jun 2015

- Automated infrastructure provisioning with AWS and custom Ruby/Python tooling
- Designed modular OO Perl frameworks for billing assurance systems
- Oracle database administration, migration, and reverse engineering
- Managed Linux systems for optimised performance across multi-client environments

Key client engagements:

The Cloud — Internal virtualised infrastructure using Chef and Ruby

SKY UK/Ireland — Automated call generation (BluGem/Perl); Oracle DBA

Virgin Media / ntl / Telewest — Telephony switch extraction via Perl::Expect

Base Telecom (Brussels) — Oracle DB migration and CRM reverse engineering

Vodafone Ireland — In-situ replacement of mediation systems

IBM Hursley Park — SME for mediation system switch for O2

Web Developer → Senior Consultant

Various · Pre-2000 · 1995 – 2000

- Integrated legacy systems with early web applications for dynamic online delivery
- Telephony switch provisioning, mediation and billing; database administration

EDUCATION

University of California San Diego

BSc Microbiology & Biochemistry (Bioinformatics emphasis) · Minor: Music · 1984–1990

INTERESTS & ACTIVITIES

Rugby — former coach, Southwark Tigers RFC · Open-source software & SmartHome integration · Enthusiastic cook
· Avid reader (Catch-22, Snowcrash, Cryptonomicon)
